# Postgraduate? Professional education at the University of Vienna

The University of Vienna is one of the largest providers of subject-specific Postgraduate Programs and courses and offers students the opportunity to enhance their academic career with additional skills and expertise of high-quality.

The majority of programs aims at providing an interdisciplinary approach; students will learn to understand how related scientific disciplines are interconnected with their specific fields of expertise. Such comprehensive understanding very often is a key requirement in everyday working life and for career prospects.

All professional education programs of the University of Vienna are adjusted to the specific demands of professional life and focus on practical use. Most of our Postgraduate Programs are part-time graduate programs for working professionals and therefore allow you to earn a postgraduate degree at the University of Vienna and to work at the same time.

You may choose from 20 master programs which are subdivided into 6 core fields of study, various programs awarding an expert title or an academic degree, and a growing range of short-term, module-based certificate courses and seminars. Please note that tuition fees as well as admission requirements and selection procedures differ from program to program.
