Master's thesis research proposal

A research proposal must be submitted together with this application. The research proposal is the basis for decision-making for the director of the university continuing education and training program. Furthermore, the research proposal helps guide both the student and the supervisor. The research proposal should cover the following contents: preliminary working title, short description of the submitted topic, summary of the content and structure, research gap, question(s), academic hypothesis/hypotheses, expected results, aim of the master's thesis, methods, time and work schedule, sources, preliminary bibliography.
